

Welcome to Frodsham Townfield Allotments

We strive to be a friendly and welcoming allotments and there are very few 'rules' as a result.

Please make sure you padlock the car park gate if you are the last to leave. If you haven't got your own key then use the key safe key (code 1470) and return it to the key safe making sure you shut that as well.

Sheds should be at the back of plots and painted green.

You can grow whatever you want : fruit, veg, and flowers; and you can keep chickens.

When it is dry you can drive down to your plot to offload heavy stuff. As the tracks are quite narrow we would prefer it if you took your vehicle back to the car park after unloading especially if its a busy day. Obviously if mobility is a problem or you have children you can park your car near the plot especially if you're a long way from the car park. We usually have to block off the main track from November to Feb because it gets too soft to be used. The water has to be turned off in winter and we send an email when it happens.

We have a large compost heap in the far corner of the site by the pony field. Only put organic stuff that will compost on the heap. Put it on the heap in current use rather than the one under the tarpaulin. No pots, plant trays, wood, gloves and cans or food cartons, (we have had all of these dumped there!) remove that rubbish yourself to the town recycling site in the station car park or back to your own bin.

We communicate mostly by email from [townfield.allotments@gmail.com](mailto:townfield.allotments@gmail.com) and the emails are sent as 'blind copies' to protect your email address so they often go into junk or bulk mail. You need to accept the address in your contacts to stop this happening.

Plot holders get a 10% discount at Gleaves & Bridge Timber

From time to time we get deliveries of shreddings, muck, and planks, and we'll let you know when that happens.

The website is [frodshamtownfieldallotments.uk](http://frodshamtownfieldallotments.uk)

There are plans to try and get grant funding for a composting toilet on site.
